Year: Technology*

The Northeast District of GCCTM Presents...

iPods -- More than a Music Machine! Using Podcasts as a Teaching Tool

Presented by:

Dr. Jay Tarby

Director, Instructional Technology Services
John Carroll University

Mr. Tom Phillips

Instructional Technology Consultant

When you think of an iPod do you have visions of someone jogging with those famous white wires hanging from their ears? Someone working in the garden? The iTunes gift card you can purchase just about anywhere? Are you aware that you can create and store your own podcast – both audio and video? Your students can download them onto an iPod or a Mac or a PC.

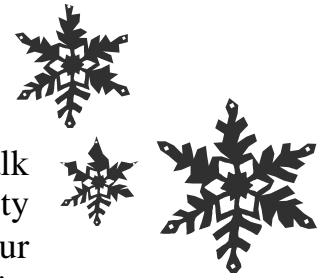

Learn more about this new technology, podcasts that are currently available (free!) and how to create your own podcasts. You don't need to be a Mac User or own an iPod to do it! This session is appropriate for teachers of any grade level!

This meeting of the Greater Cleveland Council of Teachers of Mathematics will take place in room E 241 of the Dolan Center for Science and Technology at John Carroll University. Mark your calendar for January 11, 2007 from 5:00 pm – 7:00 pm. Registration information is in this issue of *Number Notes*.

For more information contact Linda Gojak (lgojak@jcu.edu).

President's Message,

What a great turnout for the last meeting with Dr. Antonio Quesada of the University of Akron. It was obvious from his talk why he was selected for the GCCTM teaching award, University level, last year. If you missed the meeting, it would be worth your while to visit our website, www.mycctm.org and take a look at his power point presentation. Special thanks are due to Anna Marie Tabernik, Teresa Graham, and Barb Younkin for all their work preparing for this meeting, and also for Dick Little and Teresa Graham for swelling our attendance with BW students. They are always welcome.

The suggested revisions for our constitution are on our website, www.mycctm.org. We are trying to make this document reflect our actual practices, clean-up typos, and make it be more in line with Robert's Rules as far as official meetings and voting. We will discuss these proposals at the January meeting.

Please consider nominating a deserving teacher for our annual teaching awards. There are forms within this newsletter, or you can go to our website, www.mycctm.org and download these same forms, then send the nominations to the appropriate district director.

Don't forget to check the website: www.mycctm.org. Newsletters will be posted there. That way when you misplace this hardcopy and haven't mailed in your registration you can go to the website and print-off another form.

We have a few people who have agreed to help-out with writing of the 5-6 contest, but we still are in search of someone to host a meeting for volunteers to write the contest. We already have some people to help write the contest, someone to take these questions and put them into the computer, and others to handle registrations, printing, and mailing. Are you that person to fill this need and host the writing meeting? We are running out of time!

Please notice the registration for our Technology Workshop on February 10, 2007. We have 15 sessions offered with something for everyone grades K-12, during each of the three time slots. Make copies of this form and distribute to teachers in your school and/or district. If you misplace this form, guess what? You can find it on our website, www.mycctm.org and get this registration.

Mark your calendars for our next meeting on Pod Casting, January 11, 2007 at John Carroll University. Registration is in this flyer.

Have a great holiday!

Wade

Dear GCCTM Friends,

Thank you for your compassionate extensions of sympathy and the lovely planter we received in memory of Laura's mom. We've appreciated your comforting cards and words.

Sincerely,

Laura and Dick Little

Greater Cleveland Council of Teachers of Mathematics
Northeast District Meeting
